„Green Skills & Practices for Postal Services to implement the European Green Deal“

Newsletter  
no. 3

## ABOUT PROJECT

Climate change is an increasing threat to the survival of man and the world. The European Green Deal proposes a number of measures to strengthen the EU's resilience and make it a modern, efficient and competitive economy.

The **GreenPosts project**, driven by the EU's goal of zero net greenhouse gas emissions by 2050, without jeopardizing economic growth and equal representation of all regions, will improve the basic skills and competencies of employees in the postal sector in order to have a positive impact on the environment and the community. Support for green and social action for the environment by raising awareness of the impact of climate change at the local and global level and on the economy.

By promoting the goals and measures of the European Green Deal, **GreenPosts** will raise awareness of the role of postal operators, but also of each individual in creating a better environment that we all strive for, and offer solutions that would help post offices contribute to climate change resistance.

## ONLINE COURSE

The project designed and developed an online education consisting of one module and 9 lessons that follow the nine pillars of the European Green Deal. The training is intended both for employees in the postal sector and for everyone who wants to improve their knowledge and skills in applying EGD measures in their business environment, but also in their lives. In each lesson, in addition to theoretical knowledge, participants have the opportunity to see examples of good practice.

## HOW TO ACCESS THE COURSE

The course is accessed via the official website of the GreenPosts project or directly via the link <https://vtt.greenposts.eu/login/index.php>. Registration is required for access, after which you select the language in which you want to complete the education. It is available in English, Croatian, Greek and Bulgarian. There is a quiz after each lesson and it is necessary to pass it for all nine lessons in order to receive a certificate of successful completion of the course.

You can share your thoughts on the green transition and achieving the goals of the European Green Plan, <https://vtt.greenposts.eu/> as well as questions or examples of your own good practices in the Virtual think tank, which is designed specifically for the exchange of ideas and connections in order to successfully achieve the goal of climate change resistance.

# THE RESULTS ACHIEVED SO FAR THROUGH THE GREENPOSTS PROJECT:

- Collected best practices
- Designed course content and lessons
- Created online platform
- Held a three-day learning/teaching/training event
- The script and questions for the video interviews have been designed and prepared and videos in process of finalisation.
- The project team held working meetings in Bulgaria in Sofia, in Greece in Athens and in Croatia in Zagreb.

## GREENPOSTS GOALS:

- Implementation of the European Green Deal in the postal sector.
- Create a training course for employees of postal operators on how to put the European Green Deal into practice at the local level and respect the goal of sustainable development.
- Improve the green skills of employees in the postal sector at the local level by improving technical capacities, knowledge, values and attitudes to develop and support sustainable social, economic and environmental results in business, industry and the community.
